It is advised to consume 3 food spoon a day , 30 minutes before breaking the 1/23 Intermittent fasting for 3 months

Differences from other Brands

Centauri Cave Nymph Honey because of It's unique well-preserved hidden location offers intense chemical values that comes from unknown hearbs near Cave .

Distribution of phytogeographic elements are very rich approximately Euro- Siberian %50 , Irano Turanian %20 , Mediterreanean % 7 , rest is multiregional or from unknown phytogeographic that is different than any other existing Honeys in the world

Quality of Centauri Honey is not only approved by respected independent Institutions by labaravatory test report each year but also also It was verified by the official authority of the **Guinness World Records** located in London .

Regardless of any Brands comes from any countries , one should never forget that bees can never produce so many kilograms of Honey for human consumption especially If comes from extreme High Altitude .

Centauri Honey **does NOT accepts orders** from the luxury malls & shops due to It's limited quantity , rather supplies honey for own private loyal consumers travelling from Europe , Middle East , Far East countries among them are the Celebrities , Royals , Doctors , Business People since 2018 .
